IMPORTANT NOTE

LRA by ELISA/ACT tests are direct payment only. We do not accept insurance assignment. Payment must be submitted with sample.

Testing details and other important information can be found in this catalog.

For any additional information please contact Client Services at **1.800.553.5472** or **ClientServices@ELISAACT.com.**

QUICK START

- **1. Complete Account Set-Up form** to open ELISA/ACT account. Test kits can then be ordered. (see page 8 for details)
- **2. Phlebotomy:** Review blood draw instructions (see page 22 for phlebotomy instructions).
- **3. Give patient the Test Prep Booklet** at least 4 days prior to blood draw. (see page 9 for patient instructions)
- **4. Select tests to be performed.** (see pages 10-21 for test menu)

SYMPTOM / CONDITION	RECOMMENDED TEST PANEL
Simple, recent onset	Basic or Enhanced Basic
Complex, multi-system,	Comprehensive, Professional's
long term	Choice, or All Inclusive

- 5. Complete requisition form.
- 6. Schedule patient for blood draw or give patient the kit to take to blood draw location.
- **7. OVERNIGHT sample** to ELISA/ACT Biotechnologies using the return shipping label & bag provided.

What Are The Causes Of Chronic Disease And Autoimmunity?

Cells Speak...
We Listen

Reactive

Non-Reactive

The Lymphocyte Response Assay (LRA) by ELISA/ACT®, developed by ELISA/ACT Biotechnologies LLC (EAB), makes it possible to examine the general health of a patient's immune system by monitoring delayed hypersensitivity responses to over 500 common substances. The tests identify reactive substances, which may be provoking the patient's chronic condition. Patients are also provided a personalized treatment plan to help eliminate these sensitivities and restore overall health.

One of the major advancements in medicine in recent years has been our expanded understanding of the immune system and its far broader and more important role in general health and wellness. Initially, it was thought that our immune system was only involved in defending our bodies against threatening agents such as bacteria, viruses, and environmental "invaders". Medical science has now come to recognize that the immune system has defense as well as repair capabilities. The defense component of the immune system fights off the "invaders" that create disease, while the repair component plays an important role in restoring tissue and organs from damage that the disease state may have caused. If either the defense or repair function becomes overburdened or overstressed, immune dysfunction and disease may result.

Recent studies have shown that when the defense elements or lymphocytes (type of white blood cells) of the immune system are burdened due to the effects of foreign antigens, the vital repair process suffers. Organs and tissue weaken over time, and the body's ability to fight off future assaults is reduced. The effect of immune system dysfunction can result in chronic inflammatory and autoimmune diseases that often defy treatment.

The most common assaults that pose the greatest burden to our immune system on a daily basis are digestive remnants and environmental antigens. By identifying these antigens and eliminating them from our exposure, the immune burden can be reduced or eliminated, allowing the defense and repair systems to return to optimal function. The result is improved, sustainable health.

How Is LRA by ELISA/ACT™ Testing Unique?

LRA by ELISA/ACT tests are the first and only blood tests that provide a **complete** evaluation of the body's delayed immune response. A special blood drawing system, combined with simple patient test preparation instructions, prevents activation of lymphocytes prior to analysis. ELISA/ACT receives the patient's one-ounce blood sample within 24 hours and analyzes it promptly.

LRA by ELISA/ACT tests are:

Comprehensive- The only test that detects all 3 delayed allergy pathways (Type II, Type III, and Type IV) and offers the most items for testing.

Functional- Identifying only symptom provoking reactive substances, not merely the presence of antibodies, which can be harmful or protective.

Ex-vivo- The unique ex vivo system tests the lymphocytes as though they are still in the bloodstream being exposed to foreign invaders, thereby, providing highly specific and accurate information.

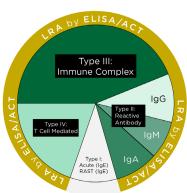

This complete assessment of delayed reactions is useful to patients and physicians in developing a cost-effective, individualized treatment plan to improve the patient's overall health.

LRA by ELISA/ACT vs Other Delayed Allergy Tests

LRA by ELISA/ACT tests: LRA tests look directly at lymphocytes and only those items that cause reactions are identified.

LRA vs Antibody tests (IgG, IgG4): IgG tests measure the presence and amount of antibodies to certain items. By not distinguishing between symptom provoking and protective antibodies however, these tests produce many false positives, making it more difficult for patients to comply with the program. In contrast, the LRA by ELISA/ACT method identifies only reactive lymphocytes, providing the most accurate and specific results possible.

LRA vs Cytotoxic (or Cell Size) Tests: Cytotoxic or cell size tests use a device to detect and count particles in the blood that are over a particular size (10 microns). Unfortunately, reactive lymphocytes are not the only particles that are detected using this method and therefore the method produces low accuracy and reproducibility. The LRA by ELISA/ACT tests report on observable lymphocyte reactions only, producing accurate, specific and reproducible results.

LRA Success Stories

"In the past decade of my practice, I have been using the elimination/ provocation test, when appropriate, combined with the LRA by ELISA/ ACT...In my opinion and experience, this is the state-of-the-art in food sensitivity detection."

Zoltan P. Rona, MDToronto, Ontario, Canada
from Return to the Joy of Health, p. 69

"I have found LRA by ELISA/ACT to be the most accurate and cost-effective means of detecting delayed hypersensitivities. The program provides the most powerful tool for health regeneration that I have encountered for patients with chronic immune conditions such as fibromyalgia, diabetes, arthritis, and multiple sclerosis, to name a few."

Susan E. Brown, Ph.D., CCNAuthor of Better Bones, Better Body

"I have worked with ELISA/ACT for the last 20 years and have found LRA by ELISA/ACT to be the most reliable and effective solution to solving my patients' chronic health conditions."

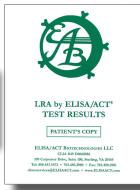

Norm Schwartz, MD Milwaukee, WI

Personalized Test Results

Patient results are sent to physician 7 to 10 business days after sending in a sample. The comprehensive results report includes:

- An accurate, detailed report identifying up to 505 substances as nonreactive, moderately reactive, or strongly reactive
- An easy-to-use guide explaining each reactive item, along with suggestions for substitutions
- A laminated wallet card listing reactive items, helpful when grocery shopping or dining out.
- Optional, individualized, nutritional supplement, and behavioral recommendations based on the patient's health assessment questionnaire completed prior to the test (if requested)
- A copy of 'Joy in Living: The Alkaline Way', explaining the LRA by ELISA/ACT program and how to easily and effectively incorporate the program into the patient's lifestyle.

A Window of Opportunity to Repair and Restore Tolerance

To begin the process of repairing the immune system, ELISA/ACT Biotechnologies recommends substitution of reactive items with non-reactive alternatives for 3 –6 months, depending on the severity of the reaction. After this period, the patient can slowly add these substances back to his/her diet one at a time, usually without experiencing any symptoms. Upon following the LRA by ELISA/ACT program, patients likely will notice health improvements in as soon as a few days or weeks. We recommend a retest within a year to evaluate the patient's progress and identify any new sensitivities.

LRA Success Stories

"I have not had any migraines since I started on the LRA by ELISA/ACT program after having them for 20 years. It's great to be free of them."

A patient from Herndon, VA*

"The LRA by ELISA/ACT has made a tremendous impact on my quality of life. I lost 35 pounds and feel stronger and more energetic each day."

A patient from Washington, DC*

"I was amazed at my fast recovery from a four-year struggle with chronic fatigue syndrome and depression once I began the LRA by ELISA/ACT program. I have returned to work, and my energy level and health are stronger than before I got sick. I never thought I could be this healthy."

A patient from Newton, MA*

"Just three days after starting the LRA by ELISA/ACT program, my chronic back and joint pain disappeared and have not come back. I am able to exercise regularly and have never felt stronger."

A patient from Ghana*

*Names and reports on file with EAB

About the Founder

Russell M. Jaffe, Md, PH.D., CCN, NACB

Dr. Russell M. Jaffe is the lab director of ELISA/ACT Biotechnologies LLC and Fellow of the Health Studies Collegium. Through his expertise in non-invasive studies of cells, he developed novel tests for blood platelet survival, fibrinogen survival, platelet aggregation, and lymphocyte response (LRA by ELISA/ACT®). He also developed the first test for traces of blood in stool that is not made falsely negative by ascorbate (vitamin C). Dr. Jaffe received his BS, Ph.D., and MD from the Boston University School of Medicine. He completed residency training in clinical chemistry at the National Institutes of Health (1973 - 1979) and is board certified in Clinical Pathology and in Chemical Pathology. Dr. Jaffe is the recipient of the Merck, Sharp & Dohm Excellence in Research Award, the J.D. Lane Award, and the U.S.P.H.S. Meritorious Service Award. He was also named an International Scientist of the Year (2003) by the International Biographical Commission for his contributions to Medicine, Biochemistry, and Clinical Immunology. Dr. Jaffe teaches and lectures widely on the causes and consequences of immune defense and repair function in health and disease. His research interests focus on outcome studies based on effective, comprehensive care guidelines and practice parameters.

1) Complete a New Account Setup form to open your account. Test kits can then be ordered from the Client Services department. Each test kit includes:

- 5 vacutainers (4 large and 1 small)
- 1 vacutainer holder (hub)
- 19 gauge butterfly needle
- · Phlebotomy instructions
- Shipping instructions
- Large plastic diagnostic bag
- · Alcohol Prep Pad

- Absorbent Pad
- FedEx or UPS airbill
- Requisition form
- · Test prep booklet
- Cold pack (2 in summer months)

Note: vacutainers have an expiration date. Please call for replacements if expired.

2) Give patient the Test Prep Booklet at least 4 days prior to blood draw date. (see page 9 of this catalog for patient instructions)

The Test Prep Booklet contains important instructions that must be followed exactly for all of our test panels. The test prep booklet also includes **Financial Policy** (to be signed by patient and returned with sample) and **Health Assessment Questionnaire** (HAQ)

If you do not have a phlebotomist, we can refer you to a phlebotomy service. The patient will need a kit if the blood is to be drawn outside of your office. If giving kit to patient, please make sure shipping supplies are included.

4) Choose the test panel to be performed (pages 10-21)

TEST SELECTION GUIDE

SYMPTOM /	RECOMMENDED TEST
CONDITION	PANEL
Simple, recent onset	Basic or Enhanced Basic
Complex, multi-system,	Comprehensive, Professional's
long term	Choice, or All Inclusive

5) Fill out the Requisition Form completely.

Make sure test is marked and payment or payment information is included. If submitting a Health Assessment Questionnaire, please indicate your choice of generic or brand name supplement recommendations on the requisition form. Contact us for additional information regarding these options.

IMPORTANT

If you draw blood on a Friday, call EAB at 800.553.5472 for special shipping instructions to ensure Saturday delivery.

DO NOT draw blood on a Saturday, Sunday, or the day before any U.S. holiday.

Patient Preparation Instructions

Blood Cannot Be Processed If Instructions Are Not Followed

This preparation process minimizes the potential for lymphocyte activation prior to the analysis and avoids medications (steroids, aspirin) and other substances that could interfere with lymphocyte reactions to antigens being tested. These instructions are included in the Patient Test Prep Booklet that should be given to patients at least 4 days prior to the blood draw.

Four (4) Days Prior To The Test (NOTE: Consult with your doctor before stopping any treatment)

- Stop taking steroids and cortisone inhalers, pills and creams. Ask your doctor for the Steroid Bridge to assist with the four-day avoidance.
- Stop taking Enbrel (etanercept), Humira (adalimumab), Remicade (infliximab), Xeljanz (tofacitinib)and other TNF or JAK inhibitors.
- Wait two weeks after the injection of a cortisone suspension.
- Include a complete list of any medications, vitamins, or herbs you have been taking with the sample.
- If taking allergy shots, please contact Client Services for optimal timing of LRA by ELISA/ACT tests.

NOTE: Theophylline (aminophylline) may, on rare occasions, interfere with the tests due to its mild antihistamine activity. The patient should be given the option of either taking the test during a drug-free interval or taking the test anyway, and if invalid results occur, retaking the test at no additional charge.

Two (2) Days (48 Hours) Prior To The Test

Stop taking all over-the-counter antihistamines, antihistamine-containing prescriptions, and aspirin (acetyl-salicylate) containing compounds such as:

Alka SeltzerBayerEquagesicMidolSine-OffAnacinBufferinExcedrinMonoGesicTalwin CompoundArthritis Pain FormulaEcotrinVanguishPercodanTriacimicin

(See your doctor or pharmacist to review your medications' aspirin content.) **NOTE:** Some topical shampoos, lotions, creams, etc. contain salicylic acid. While these should not interfere with the test, they should be avoided if possible during the 48-hour period prior to the test.

12 HOURS OF WATER-ONLY FASTING IS REQUIRED FOR THE 12 HOURS BEFORE YOUR BLOOD DRAW:

- Do not eat or drink anything except spring or distilled water.
- Drink plenty of spring or distilled water up until the time of your blood draw.
- Do not take vitamins or medications other than those listed here (see right). Always consult your prescribing physician before stopping your medication.
- From the time of your evening meal until the blood draw the following morning, brush your teeth with water only (no toothpaste).
- Do not wash your hands, hair, or body with anything but water. Avoid smoking and second-hand smoke. Do not use any beauty products or toiletries.

JUST BEFORE YOUR 12 HOUR FAST BEGINS YOU SHOULD:

 Take a shower/bath using simple soap and shampoo (nothing with added fragrance, perfume, deodorant, moisturizer, or conditioner). We suggest a glycerin soap, or baby shampoo.

- During the 12 Hour fast you may take the following if needed:
- Birth control pills/estrogens
- Blood pressure medications or water pills
- Insulin or other hormones (such as thyroid hormones)
- Anticonvulsants
- Heart medications, except quinidine
- Coumadin (blood thinner)
- Zovirax (acyclovir)
- Advil, Motrin, Tylenol, and other NSAIDs
- Do not use any deodorants, body lotions, creams, saline solution, scented hand soap, lip balm, hair products, makeup, or other beauty products after you've washed off.
- You may brush your teeth with toothpaste before the 12 hour fast begins, but not after.

THE DAY OF THE BLOOD DRAW:

- Do not take another shower, use any beauty products or toiletries, or wash your hands/face until after the blood draw.
- Do not brush your teeth with toothpaste, only water.
- Do not eat breakfast or take any medications or vitamins prior to the blood draw.
- Drink lots of spring or distilled water up until time of blood draw.

ENHANCED BASIC PANEL

212 ITEMS

Watercress

Whey

Includes **BASIC** Test Panel and the **additional 68 foods** listed below.

Alfalfa Caraway Seed Leek Rabbit Catfish Macadamia Nut Radish Algae (Chorella) Rapeseed / Canola Oil Algae (Spirulina) Chard Mace Arrowroot Coriander Marjoram Rhubarb Anchovy Date Milk, Raw (Cow) Rice, Basmati Nectarine Anise Seed Deer / Venison Rose Hips Artichoke Duck / Goose Okra Rutabaga **Baking Powder** Endive Parsnip Sardine Scallion / Spring Onion Bass Gelatin Pea, Black-eyed Gin (Juniper Berries) Pepper, Cayenne Bean, Garbanzo Spearmint Pepper, White Bean, Navy Grapeseed Oil Tamarind Perch/Mackerel Blackberry Hazelnut / Filbert Tangerine / Mandarin Pimiento Bok Choi Horseradish Orange Turmeric Pistachio Hydrogenated Oil Boysenberry **Turnip Greens** Poppy Seed **Brazil Nut** Kelp/Seaweed Walnut, English

For patients with more complex, long term conditions, we recommend the larger combination panels found on pages 13-15.

Kombu

Lactoglobulin

Pomegranate

Psyllium Seed

Buffalo

Butter, Clarified (Ghee)

Combination Test Panels

ELISA/ACT Biotechnologies offers a variety of combination test panels to meet the needs of each patient. For patients with complex, long term, multi-system conditions and symptoms we recommend one of the more comprehensive combination test panels (Comprehensive, Comprehensive + Medications, Professional's Choice, Professional's Choice Plus or All Inclusive).

Individual test blocks may also be added to create the specific test panel to meet your clinical needs.

The All Inclusive Test Panel tests all 505 substances offered by ELISA/ACT Biotechnologies.

Food Blocks

Each of the testing blocks listed here may be ordered individually or combined to create a custom panel to meet your patients' needs.

Food Block 46

Apple	Cauliflower	Cucumber	Milk, Pasteurized (Cow)	Potato, White	Tomato
Banana	Chicken	Egg, White (Chicken)	Mustard Greens/Spice	Rice, White	Tuna
Barley	Chocolate/Cocoa	Egg, Yolk (Chicken)	Oats	Rye	Turkey
Bean, Soya	Cinnamon	Gluten	Onion, Yellow	Shrimp	Wheat
Beef/Veal	Coffee, Decaf & Reg	Grape/Raisin, Green	Orange	Squash	Yeast, Baker's
Broccoli	Cola	Lamb/Mutton	Peanut	Strawberry	Yeast, Brewer's
Cabbage/Brussels Sprout	Corn (Maize)	Lemon	Pear	Sugar, Cane/Sucanat	
Carrot	Crab	Lobster	Pork/Bacon/Ham	Tea. Black	

Food Block 115

Includes Food Block 46 and 69 foods listed below.

Almond Apricot Avocado	Cantaloupe/Honeydew Cashew Celery	Flaxseed/Linseed Oil Garlic Ginger	Millet Mushroom Nutmeg	Pineapple Plum/Prune Potato, Sweet	Sunflower Tilapia Tarragon
Basil	Cheese, Brick (Cow)	Gliadin	Olive	Rice, Brown	Tobacco
Bean, Lima	Cheese, Processed (Cow)	Grape/Raisin, Red	Oregano	Rice, Wild	Trout
Bean, Mung	Cilantro	Grapefruit	Papaya	Safflower Oil	Vanilla
Bean, Pinto	Clam	Honey	Paprika	Salicylate	Walnut Oil, Black
Bean, String/Wax	Codfish	Hops	Pea, Green/Snow	Salmon/Lox	Watermelon
Beet	Collard Greens	Kale	Peach	Sesame/Tahini	Yogurt (Cow)
Buckwheat/Kasha	Cottonseed Oil	Lactalbumin	Pecan	Sole/Flounder/Halibut	
Blueberry	Cranberry	Lettuce, Iceberg	Pepper, Bell	Spinach	
Carob	Cumin	Mango	Pepper, Chili/Red	Sugar, Beet	

Food Block 166

Includes Food Block 115 and 51 foods listed below.

Amaranth	Cheese, Romano (Sheep)	Curry	Lettuce, Romaine	Quinoa	Swordfish
Asparagus	Cheese/Milk (Goat)	Dill	Lime	Raspberry	Tapioca
Bay Leaf	Cherry	Eggplant	Malt	Rosemary	Thyme
Bean, Kidney	Chestnut	Fig	Molasses	Sage	Tofu
Butter, Whole (Cow)	Chive	Haddock	Oyster	Scallop	Triticale
Casein (Cow)	Clove	Kamut	Parsley	Snapper	Turbot/Whitefish
Chamomile	Coconut	Kiwi	Pepper, Black	Spelt	
Cheese, Cottage (Cow)	Cod Liver Oil	Lentils, Red, Green	Peppermint	Sugar, Corn	
Cheese, Parmesan (Cow)	Currant	Lettuce, Red Leaf	Pumpkin	Sugar, Maple	

Food Block 238

Includes Food Block 166 and 72 foods listed below.

Acai Berry Alfalfa Algae (Chlorella) Algae (Spirulina) Aloe Arrowroot Anchovy Anise Seed Artichoke Baking Powder Bass Bean, Garbanzo	Bean, Navy Blackberry Bok Choi Boysenberry Brazil Nut Buffalo Butter, Clarified (Ghee) Caraway Seed Catfish Chard Coriander Cream of Tartar	Date Deer/Venison Duck/Goose Endive Gelatin Gin (Juniper Berries) Grapeseed Oil Hazelnut/Filbert Horseradish Hydrogenated Oil Kelp/Seaweed	Lactoglobulin Leek Macadamia Mace Marjoram Milk, Raw (Cow) Nectarine Okra Palm Oil Parsnip Pea, Black-eyed Pepper, Cayenne	Pepper, White Perch/Mackerel Pimiento Pistachio Pomegranate Poppy Seed Psyllium Seed Rabbit Radish Rapeseed/Canola Oil Rhubarb Rice, Basmati	Rose Hips Rutabaga Sardine Scallion/Spring Onion Spearmint Tamarind Tangerine/Mandarin Turmeric Turnip Greens Walnut, English Watercress Whey
Bean, Garbanzo	Cream or rartar	Kombu	repper, cayenne	mee, basinati	********

Phlebotomy Instructions

IMPORTANT!!!

If the patient has NOT followed the required fasting and preparation instructions, DO NOT draw the specimen!!

- 1. Pull back Velcro strip to remove kit contents. **Do not discard Velcro strip.**
- 2. Remove packaging from the butterfly tubing.
- 3. Attach adapter/holder combination to the infusion set by screwing the adapter into the vacutainer holder/hub and use that for drawing the vacutainer tubes.
- 4. Uncap butterfly needle. Apply tourniquet. Prepare arm with alcohol pad. Dry with sterile gauze. **Draw sample with 19 gauge needle provided.** A 19 gauge needle must be used or sample activation and damage is likely.
- 5. Draw the small 3 ml tube first, followed by the remaining 6 ml tubes. It is important to completely fill each tube. NOTE: All Inclusive panels require 8 large (6 ml) tubes.
- 6. If patient needs to be stuck more than once you will need to start from the beginning with a new needle in a different location, using a new 3 ml tube. If stuck more than once with same needle the sample will not be good.
- 7. Gently invert each vacutainer tube three to four times after you withdraw it from holder. DO NOT SHAKE!
- **8. Refrigerate samples.** All of the specimens and cool pack should be refrigerated until ready to send. (DO NOT FREEZE!).
- 9. Call FedEx or UPS the same day to pick up sample. WE MUST RECEIVE THE SAMPLE ON THE NEXT DAY.

Specimen Preparation & Shipping

Preparing Specimen for Transport

Chill the cool pack in the refrigerator at least three (3) hours. NEVER FREEZE. Blood in the vacutainers should be kept refrigerated before packing and shipping (**DO NOT SPIN**).

For Shipment

- 1. For packing the vacutainer specimen, please follow these instructions:
 - Place the vacutainers in the biohazard bag with the absorbent gauze.
 - Put the paperwork in the pouch of the biohazard bag.
 - Place the bag in the Styrofoam box on top of the foam liner.
 - Place the cool pack (or 2 cool packs in summer) on top of the blood vials.
 - Close the lid and secure the Styrofoam box with Velcro strips provided.
- 2. Place Styrofoam box into the cardboard box. These materials are needed to fully protect the specimen and keep it cool in transit.
- 3. Place the box into the plastic diagnostic bag.
- 4. Call FedEx or UPS (in the morning if possible) for pick up the same day.

WE MUST RECEIVE BLOOD SAMPLE OF LIVING CELLS OVERNIGHT.

If sending a sample on a Friday, please call Client Services at 1-800-553-5472 for special instructions to ensure sample arrives on Saturday.

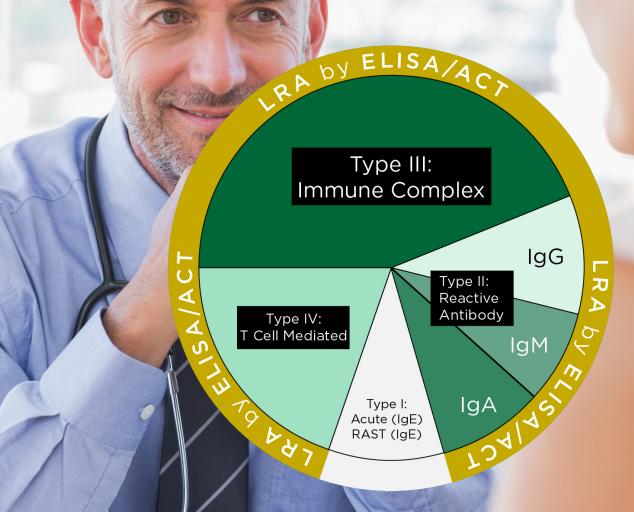

Final Check

- ☐ Patient fasted and followed all preparation instructions
- ☐ Payment is included with sample in transport box
- Requisition Form is filled out completely and included with sample

ARE ABLE TO DETECT ALL DELAYED ALLERGY RESPONSES

LRA by ELISA/ACT, is a true cell culture. Comprehensive, exvivo, functional procedures have been proven in clinical outcome studies to provide superior, sustained improvements and long-term remissions in autoimmune and immune dysfunction conditions
